OUR PRODUCTS

HEAVY ENGINEERING DIVISION

Hydraloc Lockbolt

Hydraloc is high strength bolt type fastener which eliminates problems associated with loose nuts, lock nuts, bolt, and solid rivets. It is also vibration, tamper-resistant and have consistent pre-tension values. High-speed installation, low noise level, high tensile, grade 8.8 variety of head forms and lengths are some of its features.

Hydrabom Blind Bolt

Hydrabom is specially designed Heavy Duty, vibration resistant and mechanically locked blind fasteners which are used in various structural applications. This type of fasteners is used in single side access & provides fast and efficient fastening of joints with the help of our installation tool with minimum effort and inspection.

Hydramax

Hydramax structural fastener offers high shear strength and a superior, controlled clamp which is ideal for high-strength assembly and is best used to fasten metal to metal materials. The wide grip range easily accommodates variations in material thickness. This two-piece rivet installs quickly with Avlock range of installation tool and is versatile and secure. It offers consistent, high performance in a vibration-resistant lockbolt.

Cleveloc Nut

The Cleveloc nut is a low cost one-piece self-locking nut with superior locking and re-usability characteristics. The locking collar is an integral part of the nut and is formed into a geometrically developed ellipse. This provides two locking elements of consistently uniform shape and thread contour which permit the bolt threads to engage smoothly during assembly.

Hydraulic Power Pack

Avlock India's hydraulic Power Tool is a robust, rugged, high production tool, designed for rapid and secure installation of Lockbolts. The tool is designed to work in extreme conditions. The availability of a wide range of Hand held units, hose equipment and Hoses in different lengths makes it possible to place the entire range of Lock bolts quickly.

Installation Tools

Our lockbolt hydraulic installation tool range are high performance and light-weight. Use of these tool reduces operator fatigue by its ergonomic and user-friendly design. The Avlock tool range is becoming a necessary requirement in every workshop and assembly line due to its durability and low noise mechanism feature.

Hydro - Pneumatic Riveting Tool

Our A5000 Series of Hydro-Pneumatic tool is ideal for fastening small diameter Lockbolt/Huck Bolt efficiently with a comfortable ergonomic design. The innovative hydraulic operation of the tool reduces shock loading during operation and increases the time before re-priming. The one-piece design of the forged aerospace-grade aluminium-alloy head and handle, delivers the optimum combination of low weight, high strength, and lasting durability.

ABOUT US

Avlock India is the world's leading manufacturer and distributor of specialized fasteners, Sealing & flow Control technology and associated installation equipment. We are an Indo-South African joint venture company having an ISO 9001:2015 certification in Manufacturing and Distribution of Engineering Fasteners and Installation tools. We are also an RDSO-approved supplier for Indian Railways and an IATF 16949-approved sealing solution provider for the Automotive Industry.
